

## Ben Wynne Presents "Using Additive in a Fully Integrated Approach to Investment Casting" at AM4IC.

Feb 7, 2023

Our newest member, **Ben Wynne of Intrepid Automation**, will speak at AM4IC in March about the impact additive technology will have on the investment casting process. His talk will provide the framework for adopting a fully integrated approach to using digital 3D patterns: identifying where they provide the most benefit, how to optimize additive technology for high-volume production, and how foundries can integrate best practices around additive technology to reduce costs and production times.
